Spearphishing & Malware

- ✓ Don't click links or open email attachments
- ✓ Use text only email
- ✓ Tell your friends to share files through Box, DropBox, FilesAnywhere or similar services
- ✓ Encrypt important information and frequently back it up

Passwords

- ✓ Set different passwords for all your accounts
- ✓ Use symbols (\$,!,% etc.) to make them hard to guess
- ✓ Change passwords every 90 days
- ✓ Use a password manager to store passwords securely

Smartphone & Tablet Apps

- ✓ Delete apps which you don't use
- ✓ Turn on WiFi, Bluetooth, NFC & GPS only when needed
- ✓ Learn & understand app privacy settings before agreeing to share your information
- ✓ Update your apps & devices as and when updates are available

Social media

- ✓ Do not advertise where you are and aren't
- ✓ Limit sharing photos & info to family and friends
- ✓ Try viewing your profile as someone outside your friends list would see and tweak your privacy settings

Privacy & Identity

- ✓ Monitor your credit reports and scores regularly and subscribe to a credit monitoring service
- ✓ Use credit cards instead of debit cards or cash as credit cards offer faster resolution & remediation in case of fraudulent transactions
